BIOINFORMATICIAN POSITION

**Molecular Virology Group, Barcelona Biomedical Research Park
University Pompeu Fabra, Barcelona**

We are seeking a talented and motivated bioinformatician to join our dynamic team and play a crucial role in advancing our understanding of viruses and their impact on human health.

Viral research has evolved to encompass an extensive array of data type. This diversity calls for a highly specialized, interdisciplinary approach. As a bioinformatician, you will be at the heart of this collaboration, bridging the gap between experimental data and meaningful insights.

Two recent examples of our work include: *Nat Commun.* 2022 doi: 10.1038/s41467-022-31835-x ; *Nat Commun.* 2019 doi: 10.1038/s41467-019-09199-6

Our international group is integrated into the Biomedical Research Park of Barcelona (PRBB), one of the largest hubs of biomedical research in southern Europe. For more information visit the websites below:

<http://www.prbb.org/> and <https://www.upf.edu/web/virology-unit>

Candidate Requirements and application (please DO NOT apply if not met)

Strong background in bioinformatics and experience in the management of Biological Databases, high-throughput data analysis, programming languages, and biostatistical methods will be valued. She/he should be fluent in English and have an interactive personality

Conditions

3-year contract (annual salary depend on experience level)

Starting date: flexible, November 2023 to May 2024

How to apply

To apply please submit the following to juana.diez@upf.edu indicating in subject "position in bioinformatics":

- A letter of interest that includes your experience, long-term career goals and putative starting day.
- CV ,including the contact details of 3 referees.
- 2 letters of reference
